1/2 the price of wood
1/2 the weight of wood
1/2 the maintenance
Twice the warranty

The Original **STEELHOUSE**[®] Door is an innovative "Modern Carriage Door," manufactured entirely of steel with 9 styles in the series and hundreds of possible designs. Optional top sections, including arches and glass designs, and authentic hardware accent the styles. **STEELHOUSE**[®] garage doors have two-sided steel C-channel insulated facing boards with directionally-accurate wood grain texture, and are roll formed and laminated to steel backers, then mechanically fastened and bonded to a 23-gauge steel section. The RITS (Reinforced Integral Truss System) gives the Original **STEELHOUSE**[®] unmatched strength and rigidity.

STEELHOUSE...The Standard in Steel Carriage Doors!

THE ORIGINAL STEELHOUSE®

Steel Boards are Patent Pending

1st United Door Technologies combines rich traditional styling with three key benefits not found in wooden doors: They are half the weight, half the cost, and require less than half the maintenance of wooden doors. True to the carriage house style, these doors can be detailed with classically finished pull handles, hinge straps and windows. A variety of facing rail and crossbuck designs ensure your Original STEELHOUSE® (patent pending) door will be a unique finishing feature of your home.

Original STEELHOUSE® Specifications

Sections are 2-inches thick in 24-inch and 28-inch heights and are manufactured from heavy-duty 23 gauge hot-dipped galvanized steel. Sections are prime painted white and rotary embossed with a wood grain texture. Tongue and groove meeting rails are roll formed into the panel incorporating the RITS reinforced integral truss system. CFC-free polystyrene insulation with a high impact vinyl backer or optional add of a wood grain embossed 25 gauge steel backer provides the insulation for the section. Vertical stile members are 19 gauge hot-dipped galvanized I-beams pre-painted white to match the interior color of the door. Textured steel "C" channel, foam filled, facing boards 4" x .5625" are laminated to the face of the steel door with mechanical fasteners and an epoxy based cement. Bottom sections are reinforced with an aluminum "L" reinforcement angle fastened to the bottom of the section for supporting a replaceable UV protected grooved weather seal.

INSULATION: CFC-free polystyrene insulation with a rigid high impact vinyl back skin with an R-factor of 6.25, or an optional 26 gauge steel wood grain embossed back skin. Calculated door section R-Values are in accordance with DASMA TDS-163.

H-3 HARDWARE AND TRACK: Heavy Duty commercial top and bottom fixtures with 14 gauge wide body hinges. 11 Ball white nylon rollers, galvanized torsion tube, coated spring wire, self-locking fasteners, red interior lift handles, interior lock, and .051 Vertical tracks and .060 Horizontal track. All exterior decorative hardware is optional.

MODELS: Andover, Bradford, Cascade, Essex, Pinehurst, Ranchero, Sage Creek, Tehama and Woodview (all doors shown are 3 section 7'. 8' doors have 4 sections. For configurations visit our web site.)

COLOR: All doors are prime painted white from the factory and require post-painting. The examples shown have been painted to show some of the possibilities that further enhance the wood effect. All doors require post painting.

WIDTHS & HEIGHTS: Widths: 8', 9', 10', 16', and 18' Heights: 7' (3 section), and 8' (4 section)

UPGRADE OPTIONS

DESIGNER GLASS OPTIONS: Nine glass designs are available: small and large versions of the Stockton, Stockton Arch, and Plain View are offered along with Stockbridge Two Bar and the Colonial. The glass types offered are: DSB clear and Tinted. Obscure and Seedie for short panel and Colonial only.
